

NDIP SAMUEL AGBOR OJONG

Senior Full-Stack & Mobile Software Engineer \ Flutter - React - Node.js

Douala, Cameroon | +237 679 267 153 | nojong23@gmail.com
Portfolio: portfolio-ndip.vercel.app | GitHub: github.com/ndip23 | LinkedIn: ndip-samuel

PROFESSIONAL SUMMARY

Performance-driven Mobile & Full-Stack Software Engineer with deep expertise in Flutter & Dart, cross-platform mobile architectures, and scalable cloud backends. Proven track record of architecting production Flutter applications utilizing Clean Architecture, reactive state management (BLoC/Provider), background GPS tracking, and Paystack fintech payment gateways. Experienced taking products from 0 to production across Android, Web, and Cloud systems with over 2,500+ commercial deliveries handled.

TECHNICAL ARSENAL

Mobile Development: Flutter (Advanced), Dart, Clean Architecture, BLoC, Provider, React Native, Push (FCM)
Maps & Geolocation: Google Maps Platform, OpenStreetMap (OSM), Live GPS Provider Tracking, Distance Matrix
Fintech & Payments: Paystack Mobile SDK, Payment Webhooks, Escrow Holding Systems, OTP Verification
Frontend Engineering: React.js, Next.js (App Router), TypeScript, JavaScript (ESNext), Tailwind CSS, Framer Motion
Backend & Systems: Node.js, Express.js, Python (FastAPI), C++ Systems, RESTful APIs, JWT Auth, WebSockets
Databases & Cloud: Firebase (Firestore, Auth, Functions), PostgreSQL, MongoDB, Prisma ORM, Docker, AWS
Mobile DevOps: Android Keystore Signing, Automated PowerShell Builds (build_release.ps1), ProGuard, .aab

WORK EXPERIENCE

Full-Stack & Mobile Developer \Freelance | Douala, Cameroon *January 2023 - Present*

- Engineered G-WASH NG in Flutter using Clean Architecture (Data/Domain/Presentation), cutting redundancy by 40%.
- Embedded dual map engines (Google Maps & OSM) for dynamic provider dispatch and real-time route tracing.
- Implemented Paystack financial escrow system holding customer funds until secure OTP service completion.
- Authored automated PowerShell release scripts (build_release.ps1) for keystore signing and App Bundle (.aab) generation.

Software Engineering Intern - Kanyuy Marketing *April 2025 - December 2025*

- Developed responsive client web interfaces in Next.js and optimized backend REST API endpoints in Node.js.
- Diagnosed and patched critical production bugs across multi-device viewports, ensuring 100% mobile compatibility.
- Participated in agile development sprints, CI/CD automated deployments, and API integration testing with Postman.

Frontend Developer - Chatakk Delivery *January 2023 - March 2025*

- Architected 4 interconnected React dashboards (User, Driver, Admin, Enterprise) supporting 150+ users & 2,500+ deliveries.
- Integrated Google Maps Distance Matrix & Directions APIs for automated courier dispatch and dynamic zone pricing.
- Optimized state re-renders and network caching, delivering fluid performance across 3G/4G cellular networks.

FEATURED PRODUCTION PROJECTS

1. G-WASH NG - On-Demand Doorstep Mobile Marketplace

[Flutter](#), [Dart](#), [Firebase](#), [Paystack SDK](#), [Google Maps & OSM](#), [Clean Architecture](#)

??? On-demand vehicle detailing marketplace with live GPS provider matching, distance routing, and sound popups.

??? Automated Paystack escrow pre-payment system releasing customer funds only upon OTP physical verification.

??? Multi-channel alerts via Twilio SMS, automated SMTP transactional receipts, and Firebase Cloud Messaging.

Live: [g-wash-ngl.vercel.app](#) | Code: [github.com/Otuu02/g_wash_ngl](#)

2. Bidora (AI Bid Copilot) - Tender Procurement SaaS

[Next.js \(App Router\)](#), [Node.js](#), [Prisma ORM](#), [PostgreSQL](#), [OpenAI API](#), [Tailwind CSS](#)

??? AI copilot analyzing complex tender specifications and scoring enterprise capability matrices for winning bids.

??? Subcontracting intelligence engine analyzing African and global public/private procurement databases.

??? Automated certification compliance checklist generation and real-time vendor fit scoring.

Live: [ai-bid-frontend.vercel.app](#) | Code: [github.com/ndip23/AI-Bid](#)

3. SentinelGov AI - Government Payroll Integrity Engine

[Python](#), [FastAPI](#), [Next.js](#), [Anomaly Detection Algorithms](#), [Tailwind CSS](#)

??? High-throughput risk monitoring system scanning ministry payroll registries for ghost workers and duplicate payouts.

??? Real-time anomaly dashboard with severity scoring, audit trails, and departmental compliance reporting.

Live: [sentinelgove-ai.vercel.app](#) | Code: [github.com/ndip23/payroll-ai](#)

4. PressFlow (PressMark) - Multi-Tenant SaaS Platform

[MERN Stack \(MongoDB, Express.js, React, Node.js\)](#), [Tailwind CSS](#)

??? Multi-tenant software platform with isolated tenant database schemas, automated subscription billing, and super-admin metrics.

Live: [pressmark.site](#)

5. Mascode Lab - Digital Engineering Agency Platform

[Next.js](#), [TypeScript](#), [Tailwind CSS](#), [Framer Motion](#)

??? High-performance corporate site and academy platform showcasing digital products, client services, and student training curricula.

Live: [mascodelab.com](#) | Code: [github.com/ndip23/mascode](#)

6. Fitness Dashboard - Cross-Platform Health Application

[Flutter](#), [React Native](#), [Local Storage](#), [QR Verification Engine](#), [Tailwind](#)

??? Workout and nutrition tracking application featuring activity rings, daily calorie burn analytics, and digital QR check-in badges.

Featured on [portfolio-ndip.vercel.app](#)

EDUCATION

Bachelor of Engineering \(\text{B.Eng.}\) in Software Engineering

[2023 - 2027](#)

Faculty of Engineering and Technology - University of Buea

Key Coursework: Mobile Communications & Computing, Distributed Systems, Software Architecture, Cryptography, OOP System Design.
